

A study on:

VEHICULAR FUEL EFFICIENCY

Are some streets less fuel-efficient than others?

What's the most fuel-efficient route for my commute?

How well is my car doing on gas relative to others in its class?

Can "green driving" skills help consume less gas for the same trip?

Drivers Needed!

Volunteers are needed for a driving study.

Compensation is:

\$1/mile*

For details, please send e-mail to:

Prof. Tarek Abdelzaher

zaher@cs.uiuc.edu

*Volunteers will be expected to drive a minimum of 20-30 miles, but may opt out earlier if they wish. Compensation will be prorated at the rate of \$1 for every mile for which data is collected. The maximum total compensation per individual is \$100.
